

CP 2015 Table 2B. Predictive R2 under the EH null

phi_tau	phi_r	P5	P50	P95
0.800	0.75	-0.003	0.007	0.045
0.975	0.75	-0.002	0.019	0.096
0.999	0.75	-0.002	0.022	0.102
0.975	0.60	-0.003	0.015	0.083
0.975	0.75	-0.002	0.019	0.102
0.975	0.90	-0.002	0.029	0.125

Percentiles of the adjusted R2 from $rx_bar \sim (\tau, r)$ under the EH ($\lambda=0$), 5000 sims, $T = 470$.

P95 rises with persistence (right shape); level is below CP's 0.19–0.23 due to underspecified calibration (see code note).
