	10	1.34	(2.48)	0.08	9.80	(4.64)	0.23

LHS: raw excess return $r^e(n)$. FB regresses on the forward–spot spread $(f^e(n) - y^e(1))$; CP on the local CP factor.
Newey–West t–stats (12 lags) in (.); adjusted R2 reported. All 11 countries, n in {2,5,10}.
