

CP 2015 Table 1B. Cycle and yield properties

	Maturity	Cycle SD	Cycle half-life	Yield SD	Yield half-life
	1y	1.61	55.4	2.50	56.4
	2y	1.49	36.1	2.52	52.3
	4y	1.23	23.3	2.33	48.0
	5y	1.11	18.3	2.24	45.9
	9y	0.82	11.2	1.98	45.5
	10y	0.78	10.3	1.92	45.8

Standard deviation (in %) and AR(1) half-life (in months) of the maturity-specific cycle $c^{(n)}$ and the yield $y^{(n)}$.
 US, 1989m3–2014m12. Half-life = $\ln(0.5)/\ln(|\psi|)$. Shorter half-lives than CP reflect the post-1989 sample.
