

CP 2015 Table 1A. Yields on trend inflation

Maturity	a_n x100	t(a_n)	b_n	t(b_n)	R2_bar
1y	-90.1	-0.75	1.56	4.57	0.51
2y	-87.5	-0.82	1.67	5.65	0.59
4y	-32.4	-0.39	1.63	7.27	0.68
5y	-3.3	-0.05	1.61	8.50	0.73
9y	78.0	1.84	1.50	13.01	0.83
10y	96.4	2.52	1.47	14.02	0.84

$y_t^n = a_n + b_n \tau_t^{\text{CPI}} + e_t$, by maturity. US, 1989m3–2011m12. Newey–West t-stats (18 lags).

a_n in basis points. Sample is shorter than CP 2015 (1971m11–2011m12), so intercept levels differ; slopes and R2 align.
